Fall + 1957

An Open Letter To Our Many Customers OCT 28 57

Dear Friend:

This Fall we had not intended to publish a wholesale price list for the simple reason that we were swamped with orders from our wholesale customers (several thousand seedsmen, nurserymen and florists scattered throughout the 48 states). But as the weeks passed we were flooded with requests—even pleas from the many thousands of retail customers we have acquired over the years.

So this is our answer to these requests. It is not an elaborate catalog with many pretty pictures, and poetic descriptions. It is merely a price list-concise and to the point.

We realize it is a bit late—not to plant (as we have seen tulips planted in March bloom gorgeously in May) - but late from the standpoint of good business, as we know many of you may already have ordered. But we feel that many old and faithful customers are still waiting for this list. And we feel, too, that the wide range of varieties, and the low prices will entice many new customers to try our quality and service.

We wish, also, at this time to thank our many customers for their enthusiasite response to our Spring Catalog. To show our appreciation we are allowing the following SPECIAL BONUSES this Fall. These apply only on the Imported Holland Bulbs on the inside pages, and are as follows:

IMPORTED HOLLAND BULBS · EXHIBITION QUALITY · TRUE TO NAME · ALL TOP' SIZE

*(Our TOP SIZE means exactly that—the largest money can buy—a full grade above the size commonly offered as first size!)

Tulips are listed in the order in which they bloom — so for week after week of delightful color, start off with the Species Tulips, follow up with Single and Double Early Tulips, then the mid-season Triumph and Mendel Tulips, and finish off with the late May-flowering Darwin, Cottage, Breeder, Parrot and Double Late Tulips.

NOTE: 5 of a variety at $\frac{1}{2}$ the 10 rate; 25 at $\frac{1}{2}$ the 50 rate; but because of the low price—no less than 100 of a variety at the 100 rate.

BOTANICAL (SPECIES) TULIPS

Species tulips present an infinite variety of sizes, shapes, habits, and colors. Originating mostly in Asia Minor, they naturally prefer a warm sunny location. They naturalize easily, and once planted will come up every year. They are fine for the rock garden, or sunny border, and should be planted in clusters of 6 or more.

TRIUMPH TULIPS

The Triumph Tulips are the result of crossing the Single Early Tulips with later flowering varieties, resulting in a strain that is intermediate both in height and flowering time. They are fine for forcing in pots, and favored by many in the garden over Darwins, as the yellow leaves can be removed much earlier in order to prepare the beds for annuals.

DARWIN TULIPS

The Darwin Tulips are undoubtedly the most popular of all tulips, and deservedly so. The elegantly shaped flowers, borne on tall stems are a sight to behold when planted in clusters, or when massed in formal beds. They range in height from 20 to 28 inches, and flower here around Mid-May.

COTTAGE TULIPS

Cottage Tulips are commonly thought to be dwarf, early tulips. Actually they are tall-stemmed and bloom late, along with the Darwins, the main difference being that Cottage have oval shaped flowers, whereas Darwins are cup shaped. Included in the Cottage Tulips are the entrancing **Lily Flowered Tulips**.

PARROT TULIPS

An unusual group of late tulips distinguished for the gracefully waved, and lacinated petals, as well as their blotched, streaked, and veined coloring. The massive flower heads are breath-takingly beautiful, and unexcelled as cut flowers. Not recommended for pots, but can be forced in a col greenhouse for cutting.

GIANT DAFFODILS AND NARCISSI

Little, if anything, can bring to the heart the quiet joy of the dainty, dancing daffodils. They are, when naturalized in vast plantings, a sight to behold. To afford those with sufficient land to plant them freely, we have listed some bulbs that are not Top Size — but are definitely blooming size. But apart from this Special Mixture, all bulbs are TOP SIZE, which means DOUBLE NOSE NO. 1 — the largest and

EXHIBITION HYACINTHS

Actually there are six sizes of Hyancinths. We offer the best Exhibition Size — 19 centimeters and up — the size approximately of a tennis ball! This size we recommend for growing a Hyacinth glasses, or forcing in pots. For the garden we offer a smaller size, 15 to 16 centimeters, known as Bedding Size — a size which will produce very fine spikes in the garden.

WHEN ORDERING . . .

Please advise if we may substitute. Sometimes we are sold out of a variety, but have one equally good, or even better. We will only use bulbs of equal or greater value, of the same size and color, but only if you give us permission.

EXCITING DUTCH IRIS

Sometimes, and justly, called the "Poor Man's Orchid," Dutch Iris are often used by florists in corsages in place of orchids, and hence their name. Unlike other Iris, Dutch Iris are bulbs, not roots and rhizomes, and while quite hardy in most sections of the country, we recommend some protection in the more Northern latitudes. Dutch Iris are quite early — late May or early June, filling a gap in most gardens. They are invaluable as cut flowers. TOP SIZE - 8 centi-

YOU MAY USE THIS SHEET AS A CONVENIENT ORDER FORM — A NEW PRICE LIST WILL BE INCLUDED WITH YOUR ORDER.

This small ad has been appearing for years in the leading horticultural magazines, and amazing each year our sales, instead of decreasing, have been increasing. The reason? Well, our files show that many customers re-order year after year, and spread the word amongst their friends. Since many of our customers do not subscribe to these magazines, we are repeating this ad here. These bulbs, naturally, are not Top Size, but all bulbs are guaranteed to be blooming size, true to name, free from disease, and to satisfy in every respect.

AMARYLLIS DUTCH

Selected strains noted for size and shope, as well as height of bloom and free-flowering qualities. Most varieties will produce two stems, each bearing up to 4 flowers. The blooms are mammoth — up to 12 inches in diameter — opening to a round, symmetrical, outward-facing flower that defies description. Available in the following named varieties; guaranteed true to name and color.

BULBS AND PLANTS FOR INDOOR GROWING SELECTED GIANT-FLOWERED VARIETIES

AMARYLLIS-INDIAN HYBRIDS

Imported from India, these hybrids differ from both the American and Dutch Hybrids and are an interesting addition to any collection. The flowers are not always as large as their Western cousins, but are good sized. and the colors run largely to white, striped red or pink; or red, striped white. There is a wide variety in the solotion. coloring. \$1.50 each

☐ 4 for \$5.00

AMARYLLIS-JAPANESE HYBRIDS

We were fortunate in obtaining a small shipment of these interesting Amaryllis from the Orient. Described by the grower simply as "Giant Hybrids," we await with interest as will all Amaryllis fanciers, our first blooms from the new strain from Japan.

LUDWIG'S STRAIN **DUTCH AMARYLLIS**

Undoubtedly the finest strain of Amaryllis in the world. We are pleased to offer 57 named varieties. All are described in detail in Ludwig's 32-page catalog, and 21 are illustrated in full color. Send \$1.00 for this invaluable book, which amount may be deducted from purchase.

AMARYLLIS HATHOR

(Brunsvigia Hathor)
Perhaps the most beautiful white Amaryllis, producing to 15 flowers in late summer or early fall.

\$\sumeq\$ \$5.00 each

BROMELIADS

Actually members of the Pineapple family, these interesting foliage plants are not nearly as widely known as they deserve. The flowers come mostly in fascinating pastel shades, accentuated by the vividly colored bracts that cover the scape. They also make desirable foliage plants, as the leaves form rosettes — brightly colored, striped or mottled.

CLIVIA MINIATA

Interesting, easy to flower members of the Amaryllis family. The dark green foliage is evergreen, and most attractive in itself. Will thrive in shade (in fact leaves burn if placed in full sun). The flowers are borne in gigantic umbels, bright orange-red in color, and long lasting. These are not imported plants, but large specimen plants from the famous Diener collection. All blooming size.

CRINUM

Crinum is the Greek name for lily, and these bulbs are so named because of their large, long trumpet-like flowers which resemble lilies. These Amaryllis are of great beauty and of great value as cut flowers. Huge spikes carry 10 to 12 large blooms, which may be cut separately and used to advantage in floral work. Also suitable for pot culture.
